## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, drawn to a method to increase muscle growth, classified in class 514, subclass 565.
  - II. Claims 3-4, drawn to a method to improve muscle growth, endurance, strength, and power output and to aid in fat depletion, classified in class 514, subclass 565.
  - III. Claims 5-6, drawn to a method to improve muscle growth, endurance, strength, and power output and to aid in fat depletion, classified in class 514, subclass 565.
  - IV. Claims 7-8, drawn to a method to improve muscle growth, endurance, strength, and power output and to aid in fat depletion, classified in class 514, subclass 565.
2. Inventions I-IV are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions I-IV have different designs, modes of operation, and effects because only invention I uses L-arginine alphaketoglutarate, dihydrate, only invention II uses arginine pyroglutamate, only invention III uses arginine ketoisocaproate, and only invention IV uses ornithine alpha-ketoglutarate.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 1617

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the examiner knows from past experience that a telephone election will not be made (MPEP § 812.01). Therefore, since this restriction requirement is considered complex, a call to the attorney for telephone election was not made.
